

Installing

Installing by WP plug-in installer

1. Extract the zip file downloaded from CodeCanyon.
2. Navigate to `Plugins > Add New` page in your WordPress admin.
3. Click on the `Upload` button on the top.
4. Click on `Choose File` and choose **masterslider-installable.zip** file from extracted zip file. then hit the `Install Now` button.
5. WordPress **may** ask you to enter your FTP details. After entering, hit the "proceed" button .
6. Now you should see **Master Slider WP** in plugins list. Click on **Activate Plugin** to activate Master Slider WP.

WordPress codex also contains [instructions](#) on how to do the steps above.

In this method the server that hosts your website should allow upload limits greater than 6 MB. Most hosting providers, provide only up to 2MB file upload limit.

In this case you need to upload the theme by FTP or contact your host provider to increase the upload limit.

Installing by FTP

First, you need a tool for uploading plugin files to your site. you can use filemanager from cPanel or any FTP client. Some good FTP clients are :

- [FileZilla](#) for windows.
- [Cyberduck](#) for Mac.

1. Extract the zip file downloaded from CodeCanyon.
 2. Open extracted folder and extract **masterslider-installable.zip** file. After the extraction, you should see the **MasterSlider** folder.
 3. Connect to you server by FTP application then navigate to `/wp-content/plugins/`.
 4. Upload the **MasterSlider** folder, extracted previously.
 5. Login to your WordPress admin area and navigate to the `Plug-ins` page, then click the `Activate` below **Master Slider WP**.
-

Server Minimum Requirements
