Adding extra content to Facebook Slider

You could simply add all types of layers to a Facebook slide. The only difference is on **text layer**. There is a new option to help you add post text contents easily.

Insert dynamic content

You could simply add text layer on each slide and add the content dynamically by using "Insert dynamic content". There are a lot of options to help you add any related post information to slide as described below.

Insert dynamic content		
Name	Description	Short code
Photo name	Adds the photo name.	{{name}}
Photo owner name	Adds the owner name of photo	{{owner-name}}
Photo link	Adds the post excerpt, you can set the length of excerpt on "post settings".	{{link}}

The figure below shows these options on Master Slider panel.
