

Working with Slides

In this section you can set general slide options as described below.

On this Page:

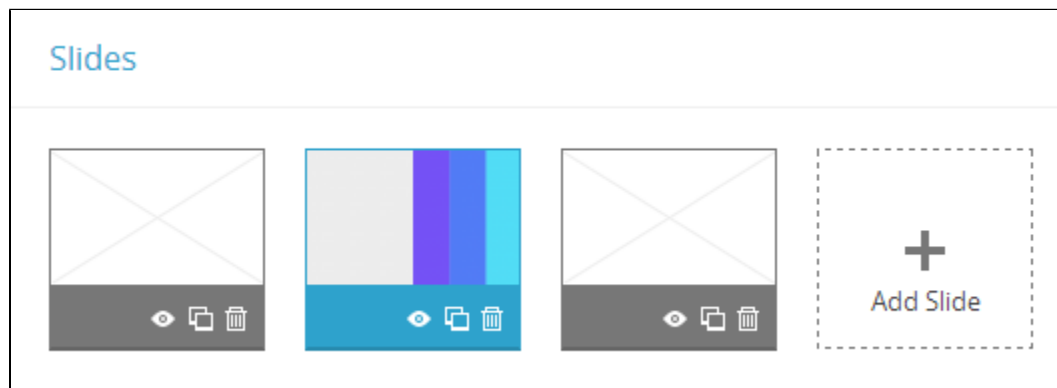

- [Add a new slide](#)
- [Slide background and thumbnail](#)
- [Slide Misc.](#)

Add a new slide

You can add a new slide under the **slides** tab. You can see the list of slides that has already been added and you could also perform the related slide operations.

Operation	Description
Add new slide	Creates a new slide by clicking on Add Slide
Remove slide	You can remove the slide by clicking on icon.
Duplicate slide	For creating a duplicate from a slide you can click on icon.
Show or hide slide	You can show or hide each slide by clicking on icon. Slider doesn't show hidden slides in front end.

The figure below shows these options on Master Slider panel.

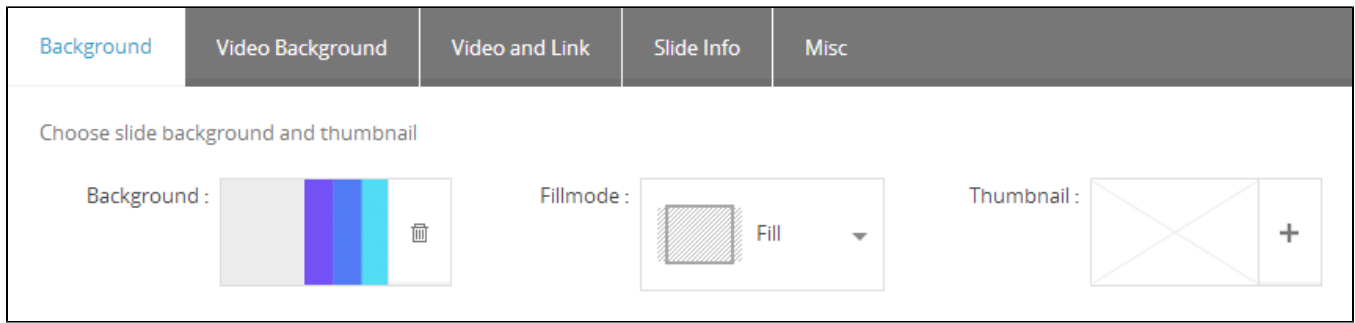

Slide background and thumbnail

In this Section you can set backgrounds and thumbnails for your slider which will be explained below.

Option	Description
Background	Specifies current slide background.
Fillmode	Specifies the slide background scaling method.
Thumbnail	Adds a thumbnail for the slide. i Please note that Thumblist control should be added to the slider or the selected template should support thumbs.

The figure below shows these options on Master Slider panel.

Slide Misc.

Here you can add a custom CSS class or ID to each slide. You could also add alt attribute to slide background image and more, which is described below.

Option	Description
Class name	you can add a CSS class to slide.
CSS ID	you can add a CSS ID to slide.
Background color	It will be used to add color to slide background.
Alt text	you can add an alt text attribute to the image in your background of slide.
Color overlay	You can add color overlay to the slide.
Pattern overlay	You can add pattern overlay to the slide.

The figure below shows these options on Master Slider panel.
