

# Slide Info Control

With this control you can specify a HTML value to each slide and slider will show the value of slide while it selected. This control searches for an element which has "ms-info" as class name in each slide.

## Options:

Name	Default Value	Description
autohide	true	Whether the control hides when mouse leaves the slider.
overVideo	true	Whether the control visible over slide video while playing.
insertTo	-	The HTML element that the info will be added in it.
size	100	Specifies the width or height (based on specified direction) of slide info container in pixel.
hideUnder	null	Hides the control if width of slider comes less than specified.
align	"bottom"	Aligns the control to in or out of slider. It accepts "top", "bottom", "left" and "right" values.
inset	false	Whether insert the control inside or outside of slider.
margin	10	Specifies the space between the control and slider in pixel.

## Example:

```
var slider = new MasterSlider();
slider.setup('masterslider' , {width:800, height:350});
slider.control('slideinfo',{insertTo:'#info'});
```
