

# Thumblist/Tabs Control

This control searches for an element which has "ms-thumb" as class name in slider html then creates a list of thumbnails.  
css class name: "ms-thumb-list"

You can create a div element with "ms-thumb" class name in each slide and use html instead of image in thumbnail list. Like following:

```
<!-- new slide --><div class="ms-slide">  
  
  <!-- slide background -->  
    
  
  <!-- slide text title it shows in thumbnail list. -->  
  <div class="ms-thumb">lorem ipsum</div>  
  
</div>  
<!-- end of slide -->
```

## Options:

Name	Default Value	Description
autohide	true	Whether the control hides when mouse leaves the slider.
overVideo	true	Whether the control visible over slide video while playing.
width	100	Specifies the width of each thumb in pixel.
height	100	Specifies the height of each thumb in pixel.
type	"thumbs"	Specifies the type of control, it can used as "thumbs" or "tabs".
dir	"h"	Specifies the direction of control. It accepts two values "h" (horizontal) and "v" (vertical)
speed	17	Specifies scrolling speed. It accepts float values between 0 and 100.
hideUnder	null	Hides the control if width of slider comes less than specified.
align	"bottom"	Aligns the control to in or out of slider. It accepts "top", "bottom", "left" and "right" values.
hover	false	Whether change slides on hovering over thumbs.
arrows	false	Whether add arrows in thumblist
inset	false	Whether insert the control inside or outside of slider.
margin	10	Specifies the space between the control and slider in pixel.
space	10	Specifies the space between thumbs or tabs.

## Example:

```
var slider = new MasterSlider();  
slider.setup('masterslider' , {width:800, height:350});  
slider.control('bullets');  
slider.control('thumblist' , {autohide:false , dir:"v"});
```
