

# General Settings

In this Section you can set general options for your slider as described below.

Option	Description
Slider name	Specifies a name for your slider. It is only used in the admin area.
Slider width	Base width of the slider in pixels. Slider will re-size layers and other elements lower than this value.
Slider height	Base height of slider in pixels <b>i</b> if enabled , automatically crops and re-sizes slider images based on the size above.
Slider sizing method	The sizing method of slider. Using this feature you can make a <b>full-screen</b> or <b>full-width</b> slider even if it is not supported in your theme. It also supports <b>boxed</b> and " <b>visible nearby slides</b> " layouts.
Slider Auto-height	Whether the slider adapts its height to each slide height.
Slider wrapper width	Set the wrapper width of slider (slider parent). If left blank, slider will automatically set it .(Slider uses this setting to align slider controls).

The figure below shows these options on Master Slider panel.
