

Updating

Plugins

Auto update

To activate the auto update, go to **Master Slider settings > Enable Automatic Update** tab, then fill **Your Envato Username** and **Master Slider Purchase Code**.

By enabling auto update feature, you will access to premium sample sliders too.

General Settings | **Enable Automatic Update** | WooCommerce Setting | Advanced Setting | Replace Settings

Enable Automatic Update

To enable automatic update for Master Slider, a valid purchase code is required.

Your Envato Username [\(How to find your envato username\)](#)

Master Slider Purchase Code *Please enter purchase code for your Master Slider [\(How to find your Item's Purchase Code\)](#)*

[Activate License](#) | Your license is NOT active

Manual update

1. Go to your CodeCanyon account and, in the download page, re-download the plugin (updates are free of charge)
2. Remove ``/wp-content/plugins/masterslider`` directory on your website using FTP
3. Extract the downloaded package file and find ``masterslider-installable.zip``
4. Extract ``masterslider-installable.zip`` directory to your computer and upload it to ``/wp-content/plugins/`` directory using an FTP
5. Activate the plugin in the plugins page

Please note:

You can simply remove Master Slider from Installed Plugins menu by clicking the *delete* button. Please notice that this will **not** remove any of your sliders data.
